

The See Something, Send Something App

Guadalupe Police Chief Sees Need for Smart Device App

Chief Gary Hoving and the Guadalupe Police Department are the first in California to use the new smart device technology that boasts two-way communication, geofence capabilities and mobile alerts.

Guadalupe, CA, June 18, 2018 - The Guadalupe Police Department has chosen to implement the See Something, Send Something app to supplement their crime fighting efforts. An excerpt from the agency's website says "They [We] are committed to providing a safe community in which to live, shop and visit."

The smart device apps allows law enforcement to set up invisible geofence broadcast notifications that alert community member's smart devices with pertinent information. After receiving information or as part of proactive empowerment, app users can submit tips with pictures, videos or attachments.

"Under a community policing model for service, the police department is an integral part of the community."

— **GARY HOVING**
CHIEF OF POLICE

Chief Gary Hoving and the Guadalupe Police Department are the first in California to use the new smart device technology that boasts two-way communication, geofence capabilities and mobile alerts.

The app is available in the iOS app store and

Google marketplace.
